WHY CLEAN GRAIN?

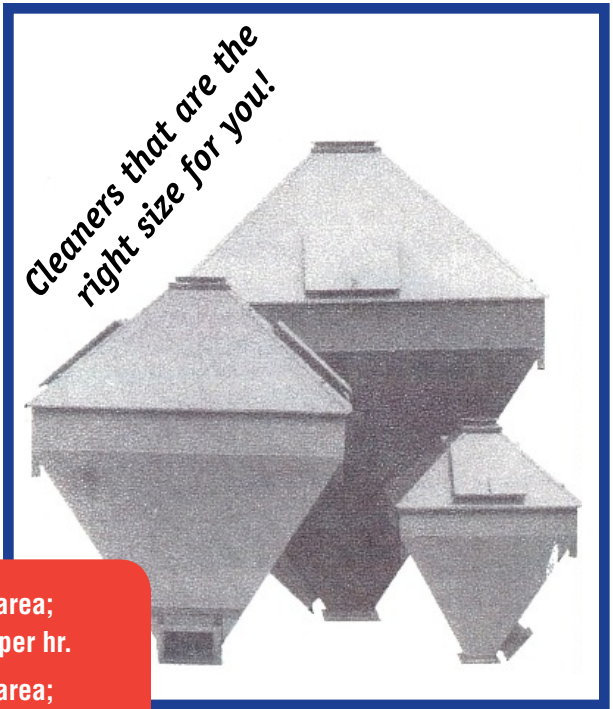

- Reduce in storage shrink and damage increases
- Store at a higher moisture content
- Reduce aeration costs
- Store at higher moisture content
- Reduce freight costs
- Improve effectiveness of fumigants
- Reduce turning
- Generate customer satisfaction

SQUARE GRAVITY GRAIN CLEANER

Our Grain Cleaners are made with a square body with inside top spreading screen cone round. By having top round screen cone, 100% of the screens are used. There is an adjustable inlet collar to control the flow of grain over the screens. The thinner the flow, the more effective is the cleaning action.

The top cover is made in four removable sections. The screens are also in four sections each (total 8 pcs.) and are made of tempered hard wire. Various size screens are available for different grains.

We cannot make any claims as to the percent of foreign material that our cleaner will remove as this depends on the flow rate over the screens and the moisture content of the grains.

- 6" - 2100 sq. inches screen area; max. capacity 1700 bu. per hr.**
- 8" - 3800 sq. inches screen area; max. capacity 3000 bu. per hr.**
